### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: \_\_\_\_.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6-9, 11, and 16-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Tschudin.

Tschudin discloses a paper towel dispenser comprising all the elements claimed including, inter alia, a rear member (e.g. 12); at least one adhesive strip (e.g. 20), a first arm (30); a second arm (30); and a roll of sheet material (e.g. 45). Figs. 1-2.

Regarding claim 11, paper is odor absorbent.

Regarding the length of the sheet, since refrigerators come in a variety of sizes, the length shown by Tschudin anticipates this limitation.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

4. Claims 1-9 and 11-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moreno in view of Tschudin.

Moreno discloses the invention substantially as claimed except for at least one adhesive strip. However, Tschudin teaches a dispenser comprising a rear member (e.g. 12) having an adhesive strip (20) for the purpose of attaching the same to surfaces, e.g. a refrigerator. Figs. 1-3, c. 2, ll. 28-41. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the device of Moreno with the adhesive strip as taught and suggested by Tschudin in order to facilitate mounting the dispenser on a surface.

Regarding claims 8-9 and 18-19, although the modified device of Moreno discloses the invention substantially as claimed except for the roll material being perforated. However, Tschudin also teaches that dispensers having a cutting edge are adapted for tearing rolls of perforated material. In view of the above, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the modified device of Moreno with perforated roll of material for dispensing. As a result, each perforated sheet is "identifying".

Regarding the length of the sheet, since refrigerators come in a variety of sizes, the length shown by Moreno and/or Tschudin anticipates and renders obvious this limitation.

Regarding claim 11, plastic is to some extent odor absorbent. As noted above so is paper.

Regarding the claims directed to the roll, they have been treated as combination claims for examination purposes.

Art Unit: 3724

5. Claims 10 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moreno in view of Tschudin as applied to claims 1-9 and 11-19 above, and further in view of Conrad.

The modified device of Moreno discloses the invention substantially as claimed except for the different layers in the roll material. However, Conrad et al teaches flexible mat material having the layers as claimed. Since the mat typically are in roll form, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the modified device of Moreno with the material as taught and suggested by Conrad in order to facilitate dispensing thereof.

### ***Conclusion***
